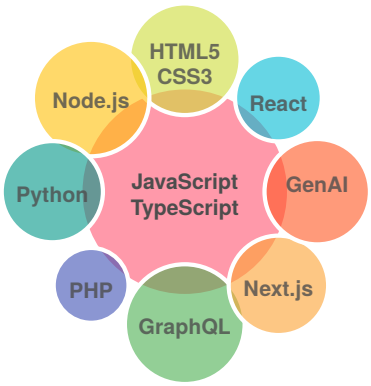
Skills



Experience

Aug 2025 - Present **CTO / Co-Founder** — Tigo

- Co-founded **Tigo**, a tech-enabled marketplace connecting families with vetted in-home caregivers, targeting the $160B+ U.S. home care market.
- Built the MVP end-to-end: a **Next.js**/**React** marketplace hosted on **Firebase** with **PostgreSQL** and **PostGIS** for geolocation features, styled with **Tailwind CSS**.
- Leveraged AI-assisted development (**Cursor**/**Claude**) to ship rapidly as a solo technical founder.

Sep 2020 - Feb 2025 **Senior Software Engineer** — Meta

- Led development of a public-facing **AI image generation** playground (`imagine.meta.com`) for the **Emu** launch. Delivered within a one-month deadline; at the time the only free image generation tool, attracting significant media attention and resharing by C-level executives.
- Maintained and developed various playgrounds within the **MetaGen** organization to support new **Llama** model releases and features, including **agent support**, side-by-side model comparisons, and file uploads.
- Created a debugging tool for **MetaGen** that tracks each step of the model request lifecycle, from prompt to final answer, highlighting changes to prompts and metadata throughout the process.
- Led front-end development for multiple **Meta Financial Technologies** (MFT) tools, improving internal adoption of new financial products.
- Contributed to bringing a **NFT wallet** viewer to **Facebook** and **Instagram** web.
- Maintained and modernized the **Facebook Stories** web viewer, ensuring a smooth Stories experience on `facebook.com`.

Aug 2018 - Jan 2020 **Senior Frontend Engineer** — Cruise

- Contributed to a **React** web application enabling remote control and monitoring of **autonomous vehicles** as part of the Remote Assistance team.
- Improved tooling and test coverage by adding support for **Enzyme**, **Storybook**, and **Puppeteer**.
- Spearheaded rendering of the **WebGL** scene using the internal library **Worldview**.

Passions

Sep 2014 - Mar 2018 **Software Engineer** Yelp

- Modernized the web photos experience and led front-end for the web homepage redesign, both requiring complete front-end and back-end rewrites.
- Led front-end code packaging as part of the **micro-services** transition for the homepage project.
- Improved various components of the **iOS** business page: photo carousel header, search facet, bookmarks.
- Mentored interns and new hires; pushed code to production every other week.

Jul 2013 - Sep 2014 **Frontend Engineer** Montage Studio

- Built rich UI components for **Montage Studio**, a development tool for **Montage.js** applications, including a tree viewer and OS X-style context menus.
- Worked on a fully **JavaScript**-based stack (**Node.js** and Montage.js), a framework borrowing heavily from Cocoa's UI design patterns.

Jun 2013 - Oct 2013 **Open Source Contributor** VideoLAN

- Submitted patches for the **VLC iOS** app as an open source contributor.
- Built a web application running on the phone that enables uploading content to the device via a built-in web server.

Feb 2012 - Feb 2013 **Software Engineer Intern** dotCloud (now Docker)

- Contributed to **dotCloud JS**, an open source library providing server-less data persistence; worked on the library, documentation, and marketing website.
- Core contributor to dotCloud's web dashboard, a single-page application built with **Backbone.js** and **Bootstrap**.
- Reduced learning curve for new users by creating boiler-plate apps and interactive walk-throughs.
- Used **WebSockets** and **File API** to bring the web UI closer to feature parity with the CLI tool.

Education

2007 - 2012 **Master's Degree in Computer Science** EPITA

4-year engineering school focused on computer science. Majored in Web and Mobile technologies (MTI: Multimédia et Technologies de l'Information).

2006 **JavaScript and PHP classes** UCSD Extensions

Completed two introduction night classes to PHP and JavaScript at UCSD while in high school.

2003 - 2007 **Baccalauréat** Lycée Félix Faure

Baccalauréat Scientifique SVT option européenne, mention AB.
